

Denlee Park - Script

Me and my pain of a cousin, David, go to Denlee Park all the time to play football. We love the Park, but there is a problem. There is always a gang there. They smoke and drink and shout and muck around. They are much older than us. They make us feel small. We feel too scared to go near them.

There is another problem in our park. One day David kicked a ball into the bushes and he found a needle. He was about to pick it up and I shouted, 'Stop!' He froze and I grabbed his hand. I told him, 'Needles are really dangerous. Never touch them!' Then I told him, 'You can pick up a disease - a life threatening disease!'

We dialled 101, that's the number for the police if it is not an emergency. The police came to the park and took the needle away in a special box for sharp objects. When the gangs saw the police they were off!

We spent the rest of the afternoon playing football.
